Get Free Adding With Unlike Denominators Answer Key

To add fractions with unlike denominators, start by finding the least common multiple for the denominators. Then, divide the least common multiple by the denominator in each fraction. Take the number you get for each fraction and multiply it by the numerator and denominator of that fraction, which will make both denominators equal to the least common multiple.

~~3 Ways to Add Fractions With Unlike Denominators - wikiHow~~

Is this a correct answer? answer choices . Yes, the student correctly added. No, you cannot add unlike denominators .

No, $5 + 7$ is not 12. No, $2 + 3$ is not 5. Tags: Question 2 .

SURVEY . 120 seconds . Q. What is the first step in solving this problem? $\square + \frac{1}{2} =$ answer choices

~~Adding & Subtracting Fractions with Unlike Denominators ...~~

Adding Fractions With Unlike Denominators This is the first series of worksheets that deal with unlike denominators.

These worksheets require students to find a common denominator so that the numerators may be combined and then the answer reduced to final form.

~~Adding Fractions with Unlike Denominators~~

Add fractions with unlike denominators in this interactive math game for kids. Students will have the opportunity to practice addition with fractions that do not have the same denominator. Students will be required to find common denominators in order to add the fractions. They will be asked to simplify the fractions if possible.
