Big Idea: Turing and the Computer: Paul Strathern ...
Turing was the man who came up with a machine that could decode the Nazi Enigma messages thought with good reason to be undecipherable by the Germans. Turing is also considered to be the father of modern computing. Toward the end of his life he began to think of himself as a computer in biological form.

Turing & the computer (Book, 1997) | WorldCat.org
It has increased the speed and power of complex calculations and is without a doubt one of the Twentieth Century's greatest achievements. However, most of us, even those who use a computer, don't know how a computer really works. And how many of us heard of Alan Turing, the man who was a major figure in the development of the computer?

| Strathern, Paul | Arty Bee's Books
"Just a few of the big ideas included in this riveting book are how Turing mapped out the theory of computers before a single computer had been conceived, how Turing's Colossus broke the German Enigma codes, and Turing's proof of the existence of artificial intelligence."--Jacket
