Your customers are going to give you three seconds to make the sale. Do you know what to say in those three seconds? The marketing methods of the past are losing effectiveness as consumers are getting smarter and smarter and have less and less time. What is needed is a new way of doing business—a method that is simultaneously socially responsible and far more effective than "old" marketing. This new way is The Irresistible Offer. "The Irresistible Offer is the missing link in many marketing books." —Joe Sugarman, Chairman, BluBlocker Corporation "The Irresistible Offer reveals secret after proven secret guaranteed to pump fresh power into your sales process." —John Du Cane, CEO, Dragon Door Publications, Inc. "As the world's fastest reader (Guinness Book certified) I've read just about every business and

marketing book in existence. The Irresistible Offer by Mark Joyner is, by far, the easiest and most powerful. If you want to make a profitable business (any business small or large), The Irresistible Offer should be your starting point." –Howard Berg, "The World's Fastest Reader" "I've read every book on marketing printed in the last 150 years. This is the first breakthrough in over fifty years." –Dr. Joe Vitale, author of The Attractor Factor "If I had to choose one modern marketing genius to learn from, it would be Mark Joyner. The Irresistible Offer belongs in the hands of everyone wanting to wildly succeed in business." –Randy Gilbert, a.k.a. "Dr. Proactive" host of The Inside Success Show

However, the forces of law have failed to keep ahead of advancing threats. As hijacking has become more difficult, terrorists have adopted new tactics, such as sabotage bombing. Thus, while the 1960s and the 1970s were the age of aircraft hijackings, the 1980s could be said to be the age of sabotage bomb attacks in civil aviation history.

Robert Beckford explores the dialogue between two central institutions in African Caribbean life: the church and the dancehall. He highlights how Dub – one of the central features of dancehall culture – can be mobilized as a framework for re-evaluating theology, taking apart

doctrine and reconstructing it under the influence of a guiding theme. Engaging with the social and cultural heritage that informs Christian African Caribbean culture, including the influence of slavery, Revival Christianity and working class Jamaican life, Black theology and music ranging from post-war Sound System to American Hip Hop, Jesus Dub is a detailed exploration of how throughout history, music and faith have been transformed in response to racialised oppression. Finally, Beckford demonstrates that dub style appears in the teachings of Jesus, and that Dub is a tool which can provide new ways of envisaging and practising spiritual gifts and financial giving, proposing a more inclusive theology for everyone.

Libya has a short, volatile history. Foreigners played a significant role in shaping Libya's institutions and policies, and this book explores longer term trends in the relations between Libya and the West, placing current developments in their historical context. Throughout history, the globe's most powerful actors have regarded Libya as an outlier state of little significance. Libya belonged neither here nor there and never fell under the full protection of any significant global or regional powerhouse. Libya's weak national identity, its weak institutions and its peripheral position have made it vulnerable to external influences and interventions. As a result,

Libya repeatedly falls prey to foreign powers wanting to flex their muscles. As this book narrates, this was the case in 1911, in 2011 and several times in between.

Those Germans, such as Count Claus von Stauffenberg, who fought the Third Reich from within have often been mythologised as heroes in the fight against tyranny but the truth is far more complex. This seminal book traces the history of the German resistance from the ascent of the Nazi party to the July 1944 attempted assassination of Hitler. Informed by more than four decades of research and written by the premier historian of the German Resistance, "Germans Against Hitler" offers the most authoritative history of the tens of thousands of Germans who tried to resist Nazism. Hans Mommsen considers the full spectrum of opposition, from small but still dangerous acts of political disobedience to large-scale conspiracies to overthrow government. He analyses the ideologies of the incredible assassination plot of July 20 1944, as well as those of the Kreisau Circle and the conservative, socialist, church and military oppositions. "Germans Against Hitler" is the definitive work on this subject, of vital importance for scholars and students and all those interested in the history of World War II.

This textbook introduces undergraduate students to engineering dynamics using an innovative approach that is at once accessible and comprehensive. Combining the strengths of both beginner and advanced dynamics texts, this book has students solving dynamics problems from the very start and gradually guides them from the basics to increasingly more challenging topics without ever sacrificing rigor. Engineering Dynamics spans the full range of mechanics problems, from one-dimensional particle kinematics to three-dimensional rigid-body dynamics, including an introduction to Lagrange's and Kane's methods. It skillfully blends an easy-to-read, conversational style with careful attention to the physics and mathematics of engineering dynamics, and emphasizes the formal systematic notation students need to solve problems correctly and succeed in more advanced courses. This richly illustrated textbook features numerous real-world examples and problems, incorporating a wide range of difficulty; ample use of MATLAB for solving problems; helpful tutorials; suggestions for further reading; and detailed appendixes. Provides an accessible yet rigorous introduction to engineering dynamics Uses an explicit vector-based notation to facilitate understanding Professors: A supplementary Instructor's Manual is available for this book. It is restricted to teachers using the text in courses. A comprehensive collection of contemporary and classical readings on sociological method, this book provides students with systematic analyses of each of the major strategies employed in sociological research. It may be used as a supplement or as the basic set of readings for all courses in methods. The book contains thirteen sections dealing with theory and its development; issues of sampling units; problems of developing new measurement techniques; difficulties surrounding the interview (with special emphasis on interviewing deviant, hostile, and silent respondents); the nature of causation; and a review of the major methods of proof available to the sociologist. Actual research studies, focusing in turn on the experiment, the survey, participant observation, life-histories, and unobtrusive analysis, are also included. Each section is preceded by an introduction, that defines the major issues in each paper, offers a discussion of problems not covered explicitly in the readings, and in general shows how each paper contributes to a view of interactional research processes. Because of its interactional approach, its use of classic articles, its anticipation of problems not yet formulated clearly in the literature, its illustrations of how social organizations may be studied, its inclusion of articles relevant to the social psychology of experiments, and its new statements on the

This book provides a sophisticated summary of up-to-date knowledge on the Fall of Singapore, including the critical tensions between Churchill and local commanders. A focus on the role of Churchill, and on his understanding of the guns and Singapore's fortifications, makes the Fortress central to understanding why and how Singapore fell as it did. The book includes a range of quotations that give the flavour of the time and the essence of the debates. No other book allows the reader to get a clear overview of the base, the plans, the campaign, the guns and the remaining heritage, all in one place.
