Research into the geological processes operating on Mars relies on interpretation of images and other data returned by unmanned orbiters, probes and landers. Such interpretations are based on our knowledge of processes occurring on Earth. Terrestrial analog studies therefore play an important role in understanding the geological features observed on Mars. This 2007 book presents direct comparisons between locales on Earth and Mars, and contains contributions from leading planetary geologists to demonstrate the parallels and differences between these two neighboring planets. Mars is characterized by a wide range of geological phenomena that also occur on Earth, including tectonic, volcanic, impact cratering, eolian, fluvial, glacial and possibly lacustrine and marine processes. The book provides terrestrial analogs for data sets from Mars Global Surveyor, Mars Odyssey, Mars Exploration Rovers and Mars Express, and will therefore be a key reference for students and researchers of planetary science.

This text provides an overview of the fundamental principles of computer-aided orthopedic surgery before launching into clinical applications and practical examples of its implementation. Following a question-and-answer format, the authors share their own experiences in the field and impart a wealth of information on image processing, geometric characterizations of human beings,

hardware design, development tools, and regulatory constraints. For graduate students, surgeons, and biomedical engineers, this book is a valuable refresher course and explanatory reference in computer-aided surgery.

By subjecting Nietzsche to a Platonic critique, author William H. F. Altman punctures his "pose of untimeliness" while making use of Nietzsche's own aphoristic style of presentation. Friedrich Wilhelm Nietzsche—named for a Prussian King—is thereby revealed to be the representative philosopher of the Second Reich.

The residents of Pickax are thrilled to see the moldering Pickax Hotel restored and reopened under new ownership, but when one of the first guests turns up dead, the victim of foul play, Qwilleran and his snooping Siamese cats are soon prowling around for clues. Reprint.

"Pardon my French, but you are one darn major American writer!"-Richard Bach The twelve literary, suspense tales and dark vignettes collected in Sandcastle and Other Stories are nothing short of an adventure through a roiling sea of emotion. You'll listen as an old man twisted by fate and a lost love shares his life's journey . . . marvel at a

young girl playing on the ocean shore as she becomes entangled in nets of a mercurial god . . . witness a divorced man become mired in troubles after he's coerced into taking a singles cruise . . . follow a Hollywood actor in a television drama who's always typecast as the bad boy . . . struggle along with a child kept awake by night terrors, and, most shockingly, observe a woman who hides her secretive personality from everyone on the beach one sunny day. The genuine voices of the characters, mixed with a clear-eyed tonal directness, make this a series with mesmerizing psychological interaction.

Sandcastle and Other Stories spans a broad depth of human understanding and builds a bridge between the deepest chasms of human frailty, and, by the last tale, the highest portal of redemption. Read and stand witness to unspeakable hate sitting with cozy wife, right beside unconditional love-a provocative and compelling mirror on the human condition. "Bog has a keen eye for what makes people tick, especially when their clockwork is decidedly rusty and the urges it drives are less than ideal. These stories take a microscopic view at the ordinary that, in turn, molds it into something uncanny. The underlying darkness takes different forms with each one, but never is it absent, and never does it feel anything less than utterly natural."-Josh Black, horror novel reviews

Award nominee It is the early summer of 1945, and war reigns in the Pacific Rim with no end in sight. Back in the States, Hollywood B-movie star Syms Thorley lives in a very different world, starring as the Frankenstein-like Corpuscula and Kha-Ton-Ra, the living mummy. But the U.S. Navy has a new role waiting for Thorley, the role of a lifetime that he could never have imagined. The top secret Knickerbocker Project is putting the finishing touches on the ultimate biological weapon: a breed of gigantic, fire-breathing, mutant iguanas engineered to stomp and burn cities on the Japanese mainland. The Navy calls upon Thorley to don a rubber suit and become the merciless Gorgantis and to star in a live drama that simulates the destruction of a miniature Japanese metropolis. If the demonstration succeeds, the Japanese will surrender, and many thousands of lives will be spared; if it fails, the horrible mutant lizards will be unleashed. One thing is certain: Syms Thorley must now give the most terrifyingly convincing performance of his life. In the dual traditions of Godzilla as a playful monster and a symbol of the dawn of the nuclear era, Shambling Towards Hiroshima unexpectedly blends the destruction of World War II with the halcyon pleasure of monster movies.

Restorative justice is often touted as the humane and politically progressive alternative to the rigid philosophy of

retributive punishment that underpins many of the world's judicial systems. Emotionally seductive, its rhetoric appeals to a desire for a "right-relation" among individuals and communities, and offers us a vision of justice that allows for the mutual healing of victim and offender, and with it, a sense of communal repair. In *Compulsory Compassion*, Annalise Acorn, a one-time advocate for restorative justice, deconstructs the rhetoric of the restorative movement. Drawing from diverse legal, literary, philosophical, and autobiographical sources, she questions the fundamental assumptions behind that rhetoric: that we can trust wrongdoers' performances of contrition; that healing lies in a respectful, face-to-face encounter between victim and offender; and that the restorative idea of right-relation holds the key to a reconciliation of justice and accountability on the one hand, with love and compassion on the other.

'Retrospecta' is the annual journal of student work at the Yale School of Architecture. Part historical record, part monograph, 'Retrospecta' seeks to capture and record the current life of the school. Documenting one academic year, each issue contains exemplary work from both the design studios and support courses. The daily activities of the school, including lectures, symposia, exhibitions, and studio reviews, are also highlighted through numerous candid photographs and
